PROFILE

DevOps Engineer with years of experience building and automating scalable cloud infrastructures. Expertise in Python development, Jenkins-driven CI/CD pipelines, and managing containerized applications with Docker and Kubernetes. Proficient in leveraging Terraform, Ansible, and Bash to streamline deployments and resolve complex infrastructure challenges.

SKILLS

- **Cloud & Infrastructure:** AWS, Kubernetes, Infrastructure As Code, Docker, Microservice Architecture, Linux/UNIX
- **Databases & Networking:** Relational Databases, TCP/IP Networking, PostgreSQL, MySQL
- **Scripting & Automation:** Python, Bash, Ansible, Terraform, CI/CD Pipelines
- **Monitoring & Logging:** Prometheus, Grafana, Cloud Watch

EMPLOYMENT HISTORY

CapitalOne

Oct 2024 - Present

Fullstack Developer

- Developed clean, efficient, and maintainable backend code using Python and Java Spring Boot within AWS cloud infrastructure, adhering to infrastructure as code and Linux/UNIX best practices.
- Collaborated with cross-functional teams to debug, develop, and test software solutions, leveraging AWS services and Linux/Unix systems to support robust distributed architectures.
- Implemented tokenization methods to enhance data protection and ensure secure coding practices in line with modern infrastructure as code standards.
- Conducted automated unit, end-to-end, and smoke testing to maintain rigorous quality assurance across multiple systems.
- Utilized Git, Jira, and Confluence for version control and project documentation, effectively interfacing with AWS cloud resources to streamline lifecycle management.
- Leveraged CI/CD pipelines and log management tools like Splunk to streamline deployments and enhance system monitoring.
- Deployed containerized applications using Jenkins, Docker, Sonarqube, and Kubernetes, contributing to scalable and resilient infrastructure solutions.

Zotech

Aug 2023 - Sep 2024

DevOps Engineer

- Engineered efficient Python code to support integrated DevOps solutions on the AWS cloud platform, optimizing deployment processes.
- Designed containerized applications using Docker and Kubernetes to improve scalability, reliability, and network performance.
- Implemented AWS solutions-including EC2, S3, ELB, Route53, and Auto Scaling Groups-to fortify cloud infrastructure and support robust software architectures.
- Managed CI/CD pipelines with Jenkins, Git, and Maven to deliver automated deployments while upholding infrastructure as code standards.
- Collaborated with product teams to achieve high-quality builds within strict timelines, adhering to best practices in software architecture.
- Conducted configuration management and automation using Ansible, Terraform, and Bash scripting, reinforcing consistent and modern infrastructure practices.
- Monitored cloud applications with CloudWatch to ensure continuous performance optimization, effective logging, and robust system monitoring.

California Institute for Career Development

Jan 2023 - Aug 2023

DevOps Instructor

- Demonstrate expertise in Git, Docker, Bash scripting, Ansible, Terraform, CloudFormation, Jenkins, Kubernetes, and Maven, showcasing real-world use cases and best practices.
- Guide students through the intricacies of essential AWS services, including EC2, AMI, Route53, ELB, EBS, Cloudwatch, Key Pairs, Security Groups, VPC, S3, RDS.
- Experience in Infrastructure provisioning, monitoring, and maintenance.
- Led students through the process of constructing a sophisticated VProfile project, encompassing essential technologies such as Tomcat, Nginx, Memcached, RabbitMQ, and MySQL, all orchestrated within Docker containers.
- Automate tasks with Ansible, Bash scripting, Python, Terraform.
- Guide students through the process of establishing a robust CI/CD pipeline using a comprehensive stack of tools including Jenkins, Git, Maven, Docker, Kubernetes, SonarQube, and Helm.
- Educate students on how to utilize Terraform and CloudFormation for creating and managing AWS Resources.

EDUCATION

University of Cincinnati
Master, Information Technology

Aug 2022 - Dec 2023
