

SUGAR RAYMOND

DevOps Engineer

2026778451

sugar.raymond110@outlook.com

PROFILE

DevOps Engineer with a rich background in Agile methodology, I am actively seeking an engaging development role. I have a deep proficiency in a variety of technologies such as Terraform, Jenkins, Maven, Docker, CICD, AWS, and Rest APIs. My expertise extends to object-oriented programming and design, with a focus on model-view controller architecture. I am adept at setting up system configuration guidelines and have strong management skills in technical environments. My experience covers a wide range of equipment platforms, containerization, programming, network security, debugging and customer training, making me well-equipped for diverse and challenging projects.

EMPLOYMENT HISTORY

❖ Fullstack Developer, CapitalOne Oct 2024 — Present

- Develop clean, efficient, maintainable code using Python and Java Spring Boot.
- Collaborate with teams to debug, develop, and test software solutions.
- Implement tokenization for enhanced data protection.
- Conduct automated unit testing, end-to-end testing, and smoke tests for quality assurance.
- Utilize Git, Jira, Confluence, AWS, and Linux/Unix in software development.
- Experience with log management application Splunk and used CI/CD system.
- Worked with Jenkins, Docker, Sonarqube, Kubernetes for containerization and CICD processes.

❖ DevOps Engineer, Zotech Aug 2023 — Sept 2024

- Write clean, efficient code with HTML, CSS, JavaScript, Python.
- Design and develop containerized applications using Docker and Kubernetes.
- Implement AWS solutions including EC2, S3, ELB, Route53, Auto Scaling Groups.
- Manage CI/CD pipelines with Git, Jenkins, and Maven.
- Collaborate with product teams to ensure timely delivery and high-quality builds.
- Perform Configuration Management and Automation using Ansible, Terraform and Bash Scripting.
- Used Cloud Watch to monitor and debug cloud Applications.

❖ DevOps Instructor, California Institute for Career Development Jan 2023 — Aug 2023

- Demonstrate expertise in Git, Docker, Bash scripting, Ansible, Terraform, CloudFormation, Jenkins, Kubernetes, and Maven, showcasing real-world use cases and best practices.
- Guide students through the intricacies of essential AWS services, including EC2, AMI, AWS Organization, Key Pairs, Security Groups, VPC, S3 bucket, and CloudTrail.
- Experience in Infrastructure provisioning, monitoring, and maintenance.
- Led students through the process of constructing a sophisticated VProfile project, encompassing essential technologies such as Tomcat, Nginx, Memcached, RabbitMQ, and MySQL, all orchestrated within Docker containers.
- Automate tasks with Ansible, Bashscripting, Python, Terraform.
- Guide students through the process of establishing a robust CI/CD pipeline using a comprehensive stack of tools including Jenkins, Git, Maven, Docker, Kubernetes, SonarQube, and Helm.
- Educate students on how to utilize Terraform and CloudFormation for creating and managing AWS Resources.

❖ **DevOps Engineer, Agilent Technologies** Feb 2020 — Jul 2022

- Developed scripts to automate manual tasks, resulting in improved system efficiency and cost savings
- Developed a Continuous Integration/Continuous Deployment (CI/CD) pipeline that improved system reliability and uptime
- Configured and managed Kubernetes clusters to ensure high availability and scalability of applications
- Automate tasks with Ansible, Bash scripting, Python, and Terraform.
- Used Cloud Watch to monitor and debug cloud Applications. Worked with Git, Jenkins, SonarQube, Maven, Docker, Helm, and Kubernetes on AWS for CI/CD

EDUCATION

❖ **University of Cincinnati** Aug 2022 — Dec 2023

Master in Information Technology

Cincinnati
